

MAHANTESH S NIGUDGI

Python Developer | AI/ML Engineer

+91-7795781165 | mantunigudgi@gmail.com | [LinkedIn: Mahantesh Nigudgi](#) | [GitHub: Mahantesh Nigudgi](#)

SUMMARY

Python Developer and AI/ML enthusiast with a strong foundation in Object-Oriented Programming, Django, SQL, and Machine Learning. Skilled in NLP and Retrieval-Augmented Generation (RAG), and currently building hands-on experience in Generative AI (GenAI). Passionate about building scalable applications and continuously exploring modern AI technologies.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, HTML, CSS

Web Development: Django, Bootstrap, REST APIs

Databases: SQL, JSON (file-based data handling)

Tools & Platforms: Git/GitHub, VS Code, Postman

Data Structures & Algorithms: Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Dynamic Programming, Backtracking, Sorting Techniques

Machine Learning: Supervised learning, Unsupervised learning, preprocessing techniques.

Generative AI: Retrieval-Augmented Generation (RAG), Large Language Model (LLM).

PROJECTS

Vehicle Rental System

Aug 2026

Python, Object-Oriented Programming (OOP), [github.com/Mahantesh-Nigudgi/Vehicle_Rental_System]

- Developed a CLI-based vehicle rental management tool in Python using classes and dictionaries to store and retrieve vehicle data.
- Implemented rent calculation logic with input validation and identified and fixed logical bugs in conditional flow to correctly flag unavailable vehicles.

IoT-Based Health Monitoring System

May 2024

C++, Arduino IDE, MATLAB

- Built a health monitoring system integrating sensors and devices with an IoT cloud platform to remotely monitor and manage patient health in real time.
- Designed a healthcare solution that improves healthcare outcomes, enhances patient care, and analyses vital health data to detect issues early.

IoT-Based Automated Plant Watering System

May 2023

C++, Arduino UNO, MATLAB, Temperature Sensor, Moisture Sensor

- Developed an automated plant watering system combining temperature and moisture sensors for precise irrigation control.
- Used Arduino UNO as the central controller with a servo motor to regulate water pumping.

EDUCATION

PDA College of Engineering — Visvesvaraya Technological University

Sep 2020 – Aug 2025

Bachelor of Engineering (BE) in Electronics and Instrumentation Engineering | CGPA: 6/10

AWARDS & ACTIVITIES

- Cancer Awareness Marathon Run — Member (Apr 2022)
- Awareness of Higher Education in Government School — Member (May 2023)
